

Lake Erie Speedway Late Model Body Addendum

May 25, 2011

Clarification to Section E. ABC Bodies-

1. Lake Erie subscribes to the Approved Body Configuration (ABC) specification bodies as manufactured exclusively by Five Star Race Car Bodies and Aluminum Racing Products Inc. Events are open to 2004 and newer American-made full size body sedans meeting ABC specifications. Refer to the 2011 ABC rulebook for all body specifications and tolerances. **ABC Bodies/Rules will be mandatory in 2011.**
2. There will be no adding air deflective pieces inside windows or anywhere else on the car. Anyone caught with this after the race will be automatically disqualified. If asked by an official to remove an add on piece you must do it before the beginning of the qualifying race event.
