CRASH-A-RAMA

BONE STOCK COMPACT CAR

Demo Derby Rules

THE FOLLOWING RULES ARE USED FOR BOTH COMPACT CARS & MINIVANS

With the exception of the following safety modifications, all vehicles must remain 100% stock!

Compact Cars: May use any 4cyl or V-6 car or station wagons, NO MAXIMUM WHEEL BASE. **NO AMC CARS WILL BE ALLOWED!!** No in line 6cyl cars! **V-6 CARS MAY BE FRONT WHEEL DRIVE ONLY!!**

1. Interior:

All glass except windshield must be removed. Windshields may be removed, but must be replaced with wire screen or expanded metal. All broken glass must be out of the car prior to coming to the track.

Door panels, headliners, carpet, & rear seats should be removed. A bar placed behind drivers seat running from one side to the other is highly recommended. This helps to stop the seats from breaking and prevents the doors from caving in. Dash and door bars are also recommended! Bars **may not** connect to frame! Working seat belt is **MANDATORY!**

2. Body:

All molding and lights must be removed, fenders may be trimmed for tire clearance. Bumper ends may be trimmed or bent in. **NO TRAILER HITCHES!**

2a. Hood:

Hoods must be chained or bolted shut with no more than 4 chains **or** 4 bolts. Chains max. 3/8 dia. X 24 in. long. Bolts max 1/2 dia. Washers not to exceed 2 in. dia. X 1/4 thick. Bolts or chains may not pass through or around frame in anyway! Hood must have 6 in. hole cut in center to allow for fire ext. access.

2b. Doors and Hatch:

Driver doors only may be reinforced within reason. All other doors including hatch must be chained, bolted, or welded shut, with welds not to exceed 12in. per seam, trunk, or hatch. Chains not to exceed 3/8 dia. & bolts not to exceed 1/2 dia. Bolts or chains may not pass through or around frame in anyway! Bumper catch chain is recommended!

3. Frame and Suspension:

Must be 100% completely stock!! With **NO** modifications or alterations of any kind.

Rear end or differential CAN NOT be locked or welded.

4. Engine: Must be stock for that year make and model and in stock location, mounts may be reinforced, carburetor must have air cleaner. Air induction system is optional.

5. Radiator: Must be in stock location, antifreeze must be drained & replaced with clear water only prior to coming to the track.

5a. Cooling Fan:

May be removed and or replaced with an electric fan.

6. Transmission:

Mounts may be reinforced. Trans cooling line may be looped with rubber transmission line only (not fuel line!) Trans cooler may be relocated inside car, but must be covered.

6a. Transmission over flow tube:

(Puke tube) Is highly recommended! This is best done by taking $\frac{3}{4}$ heater hose & placing it over the transmission dipstick tube, route the hose out away from the exhaust (this will help avoid a major fire).

6c. Transmission shifter:

May be altered in anyway you would like. (TIP) It is also a good idea to bypass (hot wire) the neutral safety switch so your car can start in any gear.

7. Tires

Must be stock 4 ply dot car tires only! No solid, liquid filled or doubled tires. No valve stem protectors. All wheel weights must be removed. Tubes are O.K.

8. Battery:

May be relocated to inside passenger front floorboard only! Battery must be securely mounted and must be completely covered by a battery box or rubber inner tube or like material.

9. Fuel Tank System:

PLEASE PAY VERY CLOSE ATTENTION HERE!!

Any vehicle that has a stock fuel tank located in front of the rear axle may leave the tank in the stock location. All others must remove the stock tank and replace it with a boat tank in the rear seat area. Tank must be securely mounted and must have (2) 1 in. drain holes in floor under tank. **NOTE:** It is preferred and highly recommended that a 5 gal. Steel or Plastic boat tank be used in place of stock tank if at all possible!

However we realize that for vehicles using fuel injection this is not always possible. A maximum of 4 gallons of fuel will be allowed! Stock tanks that have been relocated must be completely covered by sheet metal or thick rubber type material. (To help prevent fuel splash) Tanks must be tightly capped and have a vent hose run to the outside of the car.

9a. Fuel Lines:

May not pass through the inside of the vehicle except to tie into the main fuel line on the underside of the car at the closest point possible (**KEEP IT SAFE!**)

9b. Fuel pump kill switch:

If your car has a working key ignition switch the following does not apply. All other cars using electric fuel pumps for purpose of fuel injection must have a working fuel pump kill switch that is easily accessible by safety crew. Switch must be painted orange and have the on & off positions clearly marked. **KEEP IT SAFE!** IF your fuel tank is declared unsafe you will not run, **We don't want anyone hurt!**

Approved Helmets with shield or goggles, long sleeve shirt or jacket, and long pants are **MANDATORY!** Gloves, fire suit, & fire extinguishers are **highly recommended.**

We want this event to be fun, fair, and safe for drivers and fans.

All drivers are responsible for themselves and their crew members. This is a family show please govern yourselves accordingly. **No drinking of Alcoholic beverages prior to the demo will be tolerated from anyone!!**

All rules will be **STRICTLY ENFORCED!!!** All decisions of event officials will be final. If you have any questions about any of the rules contact us **first** before you do it.

For more information please contact Chuck Rush @ 386-527-0287

**COME JOIN US FOR A SMASHING
GOOD TIME!!!!**

THANK YOU FOR YOUR SUPPORT!!!

ENDURO RULES

This set of rules will be interpreted by officials and competitors and will follow the letter of the rule. The rules will be called the KISS rule.

1. 1977 or newer 4 cylinder or V-6 passenger car
2. No turbo charged engines allowed
3. No sports cars. (2 seaters)
4. Rear wheel drive cars allowed (can not be a sports car)
5. NO 4-Wheel drive vehicles allowed
6. You may remove any item from the car that can be unbolted or unscrewed. All glass except windshield
7. Absolutely NO cutting, drilling, or grinding of any kind
8. Any stock passenger car wheel that came on the care 7'' x 13'', 14'', 15'' or 16''
9. Any DOT approved tire

ITEMS THAT MAY BE ADDED:

1. Approved hood pins
2. Approved trunk pins
3. Four (4) point harness
4. Battery box and cover with strap, battery may move to right front floor
5. Fuel tank mounts relocated in trunk (not through trunk)
6. Roll cage, single hoop with two (2) down bars – 4 POINT ONLY.
7. Chain and bolt weld doors
8. After market seat and mounts
9. 1'' lug nuts
10. Two (2) 3'' x 6'' holes in hood

CAR NUMBERS: Officials will issue car numbers by first entry and first car to pass tech inspection. The length of the race will be determined by number of cars. Two laps per car entered. The first car to take the checkered flag is the winner. The race will run counter clock wise.

Yellow and red flags will be used during the race for the safety purpose only.

All entries will run: cars with rule infractions will be penalized in laps prior to the race.

Line-Up will be determined by entry and first to clear tech.

PURSE BASED ON NUMBER OF CARS ENTERED.

OFFICIALS HAVE THE FINAL WORD IN ALL AREA.

ANYONE NOT HAVING FUN WILL BE DQ'd.
